Evening Brief

Date: Saturday August 26, 2017

Weather Summary

***** High Risk Hot / Near Record Temperatures Sunday-Tuesday for Parts of the Great Basin *****

***** High Risk for Lightning over Northeast Nevada/Idaho/Nrn Utah Mon-Tue *****

Strong high pressure takes hold of the Great Basin through early next week. Drier air continues to spread east across the region with low RH. There will be isolated thunderstorms over the higher terrain of Utah through Sunday, but otherwise dry conditions are expected. Record or near record temperatures for the time of year are expected over much of northern Nevada/northern Utah and western Idaho from Sunday through Tuesday.

A weak upper level disturbance moves around the ridge of high pressure over northern Nevada and Western Idaho on Monday with an increase in lightning activity. At this point, these storms look predominantly dry. Thunderstorms spread further east and cover much of the eastern 2/3 of the Great Basin by Tuesday. High Risk has been issued for Northeast NV into Western ID Monday, and over Northeast NV/much of ID into northern Utah on Tuesday. Lightning will likely have a high ignition efficiency as it returns to areas where fuels are already dry, and will see near record heat and very low RH over the next few days.

High risk maybe needed for some areas of the Great Basin for Wednesday, but right now the amount of moisture is uncertain.

Drier air returns from west to east from Thursday into the holiday weekend.

Preparedness Levels

Great Basin	3
National	5

Great Basin Fire Activity (from Irwin): Light Activity

New Fires and Acres: 18 fires for 44.5 acres; 2,617 acres large fire growth; 1 new large fires

Resources:

- Crews: 8 T1 IHCs in GB: 7 Committed, 1 Day Off.
 - GBCC has committed an estimated 51+ Type 3, 4, 6 engines.
 - 3-T1 and 6-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

Prolonged drier and much warmer weather will return to the Great Basin this weekend through next week rapidly drying fuels again, and resulting in holdovers in areas that received recent lightning.

We continue to have a Great Basin Fuels and Fire Behavior Advisory in effect for Nevada, Idaho and Utah, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf

Current Incident Details
